

# Digital Hydraulic Pressure Gauge

▼ DGR2

- Rated for system pressure up to 20,000 psi
- Displays in psi, bar, MPa and kg/cm<sup>2</sup>
- Zero reset - ensures that gauge reads actual pressure
- IP65 protection, UL listed, CE and RoHS compliant
- Batteries included, condition indicator on read-out
- Shut-off selectable – menu driven
- Back-lit readout allows easy reading in less than ideal lighting
- Protective cover included.

| 0-20,000                      | 1          | 0-1380                        | 0.1        |              | 0-140                         | 0.01       | 0-1400                                        | 0.1        |

Weight: 0.51 lbs.

## DGR Series

Pressure Range:

**0 - 20,000 psi**

Voltage:

**3 Volt (battery)**

Accuracy, % of full scale:

**± 0.25%**

### Gauge Adaptor GA3

For easy gauge installation into almost any system, Enerpac offers a complete line of gauge adaptors. Maximum operating pressure 10,000 psi.

Page: 151

▼ Greater accuracy and easier to read: enhance your ability to monitor and control hydraulic system pressure up to 20,000 psi.
