

30 TON HYDRAULIC TOE JACK

SUPERIOR, SAFER HANDLING IN TIGHT SPACES

TJP-SERIES

ENERPAC 

▼ TJP308, Toe Jack shown without standard long handle

High-capacity lifting from a compact footprint

- Robust and lightweight aluminium construction (80 kg) – a lighter alternative to bulky, heavy steel jacks.
- Ideal for crowded plant floors where machines are tightly spaced or installed close to walls.
- Foldable side legs and long removable handle make it easy to manoeuvre into tight spaces.

Extended stroke for higher lifting

- 200 mm stroke allows operators to lift machinery higher in a single cycle.
- Extra stroke height enables faster placement of machine skates or supports, helping to ensure efficient completion of time-critical jobs.

Superior, safer handling in tight spaces

- Lifting eyes and optional side handles enable precise positioning once in place.
- Solid rubber wheels for smooth transport across varying terrain.
- Adjustable 3-position tilting toe enables lifting from varying load angles up to 5°, and tight access points.
- Hydraulic power supplied by a remote pump allows operators to work from a safer, more ergonomic position, reducing strain and the risk of injury.
- Single-acting cylinder RAC308 included with CR400 female coupler.

**Lift higher. Reach further.
Move anywhere**

Long Handle and Side Handles

The long removable handle is included as standard. Optional side handles to be ordered separately. Model Number **CHM6**.

Hoses and Gauges

Enerpac offers a complete line of high-quality hydraulic hoses and pressure gauges. Minimize the risk of overloading and ensure long, dependable service from your equipment. To ensure the integrity of your system, specify only Enerpac hydraulic hoses and gauges.

RSM-Series, Low-Height Cylinders

Low-height, single-acting, spring-return cylinders are ideal for space restricted applications.

MLS-Series, Wheeled Machine Skates

Machine Skates offer easy and stable machine movement across various floor types.

ER-Series, Load Skates

In combination with the Enerpac SOH-Series Machine Lifts or TJP308 Toe Jack we recommend Load Skates for moving heavy loads.

30 ton Hydraulic Toe Jack

TJP308, The Lightweight Toe Jack

The aluminium design, along with integrated lifting eyes and side handles, makes the unit easier to handle and transport. Foldable side legs, an adjustable tilting toe, and a removable handle enhance usability and flexibility during operation. The design also allows for minimal ground-clearance lifting.

Superior useability in tight-clearance environments

Enerpac's new 30-ton lightweight Toe Jack with remote pump delivers higher capacity and versatility on ground-level lifting applications, offering longer stroke, tilting toe, foldable legs, and enhanced mobility. With integrated wheels and drag handle, the TJP308 provides superior ease of use and portability compared to heavier competitive models.

TJP-Series

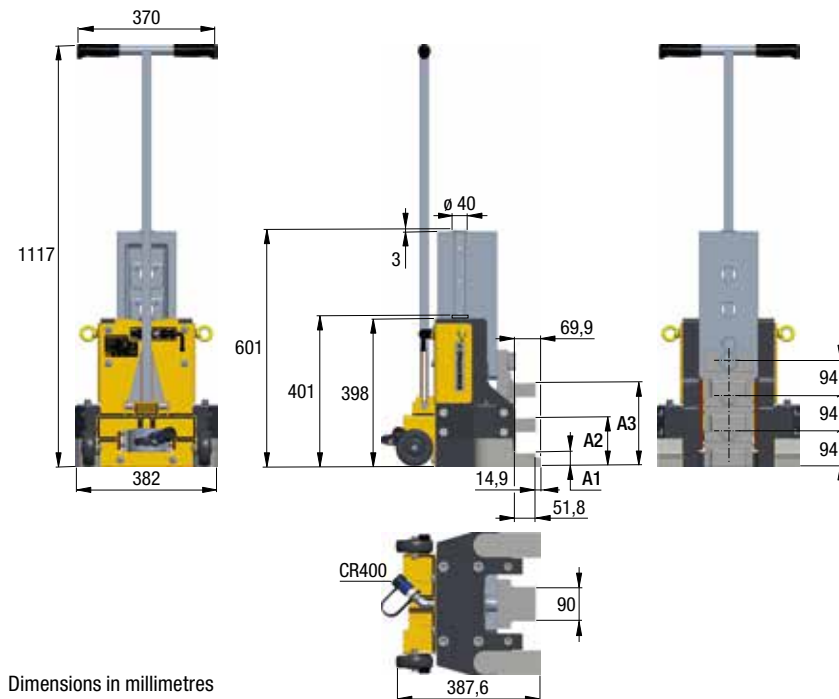

Lifting Capacity:
30 ton (294 kN)

Stroke:
200 mm

Toe Positions:
3

Maximum Operating Pressure:
700 bar

Hydraulic Pumps

Visit Enerpac.com for pumps, hoses and gauges. The following pump series are recommended with TJP-Series.

Hand Pumps: P80, P802;
Air Pumps: PATG1102N, XA12;
Cordless Pumps: XC2202;
Electric Pumps: PUJ1200, ZU4, ZE2-Series;
SFP-Series Split-Flow Pumps for synchronized multipoint lifting.

30 (294)	TJP308	37,4	235	131,4	235	225,4	235	401,0	294	200	38,5	884	80

Optional side carrying handles to be ordered separately. Model Number CHM6.

SOLUTIONS FOR MACHINE MOVING SPECIALISTS

COMPLETE PORTFOLIO OF MACHINE MOVING PRODUCTS

With our wide range of robust and reliable tools, backed by the Enerpac global legacy of ultra-reliable quality and superior precision, you can confidently take on even the most demanding jobs. Offering the perfect balance of productivity, precision, and safety, for every machinery moving project. No matter how tight the space, how little the clearance, or how heavy the load is, we have the right machine moving solution.

THE RIGHT TOOL MAKES ALL THE DIFFERENCE
